Title: Chinese Tea Website

I decide to build the site with a navigation bar. I am considering using a vertical bar for web, and horizontal bar for mobile. Tea has a variety of kinds, so there will be sufficient content to fill the site. The site will be organized primarily by types of tea, i.e. black tea, white tea, etc. Wikipedia uses anthropological points to organize its contents, but I think sorting all relevant information together can be helpful.

Information to be included:

Types of tea and Variations

History and Origin

Cultural Significance

Consumption and Trade

Calligraphy associated with each kind of tea

Photograph of tea-ware, tea, and tea leafs

Somewhere on the site will have a link to all the sources.
